News...

From the Editor...

I am working on NetScanTools Pro right now. Lots of minor changes especially in the DNS Advanced/SPF-Domain Keys tool and Duplicate IP Detection tool.

-Kirk

Managed Switch Port Mapping Tool 2.85.4 release March 2, 2021

Yes, it was released to fix an obscure XML file save problem.

After the release of 2.85.3, a user said it was hanging up when saving the XML files from the right click menu. This was tracked down to the saving of XML files to UNC path drives. Even though the share permissions we fine, there was a problem when the saving procedure completed effectively hanging up the Switch Port Mapper. This was tracked down to a missing flag in the 'CreateFile' function call. By adding in the flag, the problem went away. It is actually an SMB communications issue.

So this will be another small but important release – especially if you need to save to UNC path shares. Look for it the first week of March.

If you have a licensed copy, please use Help menu/Check for Update. Others can visit SwitchPortMapper.com to download the latest trial version.

How to Get NetScanTools Pro Updates

NetScanTools Pro: click on the help menu, then on Check for New Version. In the main right side area (or your web browser will launch) you will see an embedded web page with either a discussion of the current version and download links or a web page saying your maintenance plan has expired. If you have not registered, you will see a web page explaining that you need to register. You must register and have an active maintenance plan to download NetScanTools Pro updates.

NetScanTools Pro Maintenance Plan Pricing Changes

The price of the plan is now lower - $35 per year. We are only offering one year plans. We no longer offer multiyear plans.
