NetScanTools Pro V12 Progress Update

We're actively developing the next major release of NetScanTools—NST Pro v12. Below is a preview of our progress, with ongoing updates as development continues.

What's New

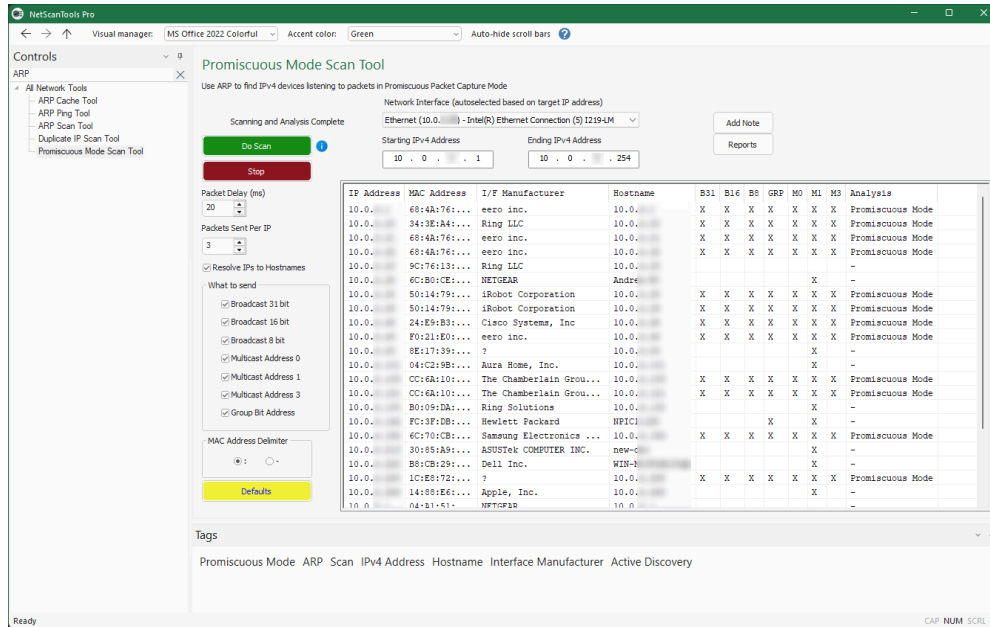

NST Pro v12 introduces a new, searchable tool navigation bar organized by name and tags, along with enhanced functionality across many tools—delivering a more streamlined user experience and improved workflows.

Why It Matters

NST Pro v12 helps you move faster and see more—combining quicker navigation, improved scan accuracy, and richer data to deliver the most precise diagnostics available.

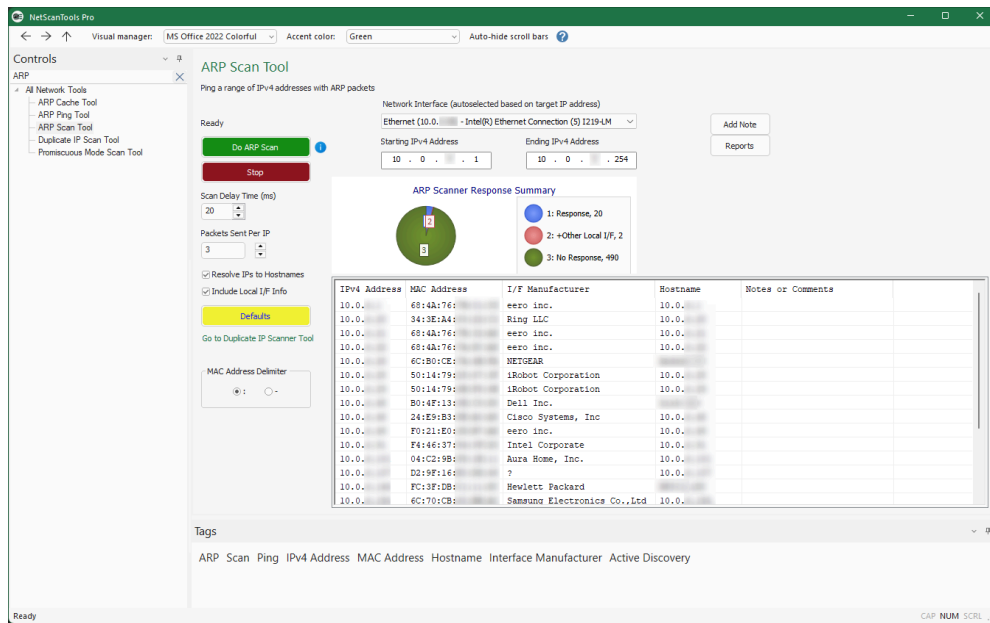

New Promiscuous Mode Scanner

- Improved accuracy with identifying listening devices on the subnet
- Faster resolving IPs to hostnames.

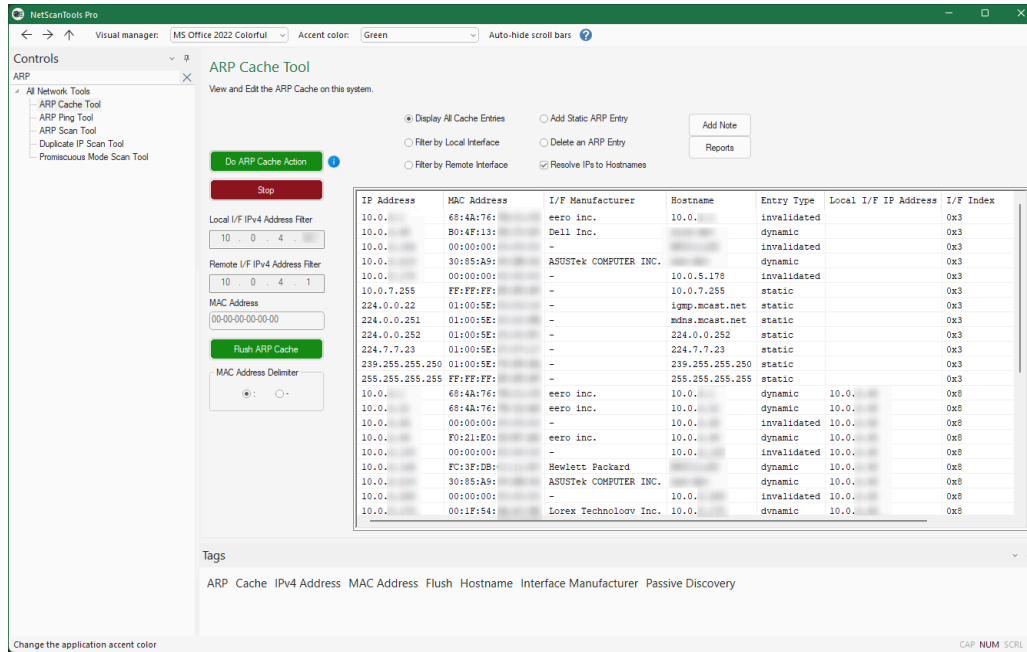

V12 ARP Scan Tool

- Now with faster IP Address to Hostname resolver

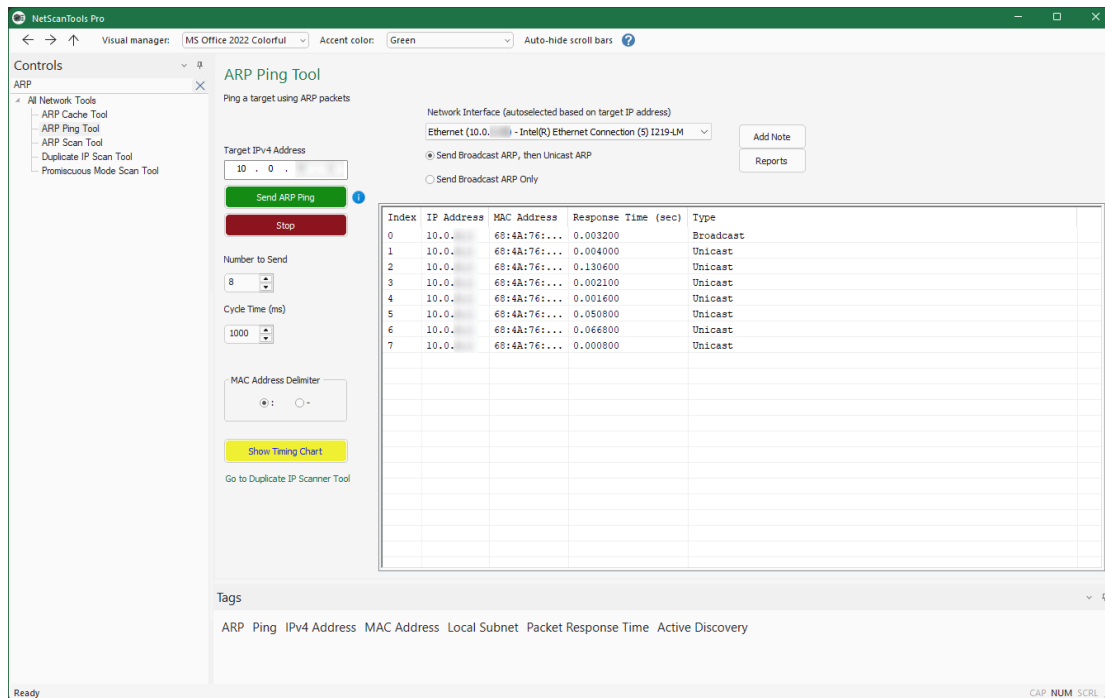

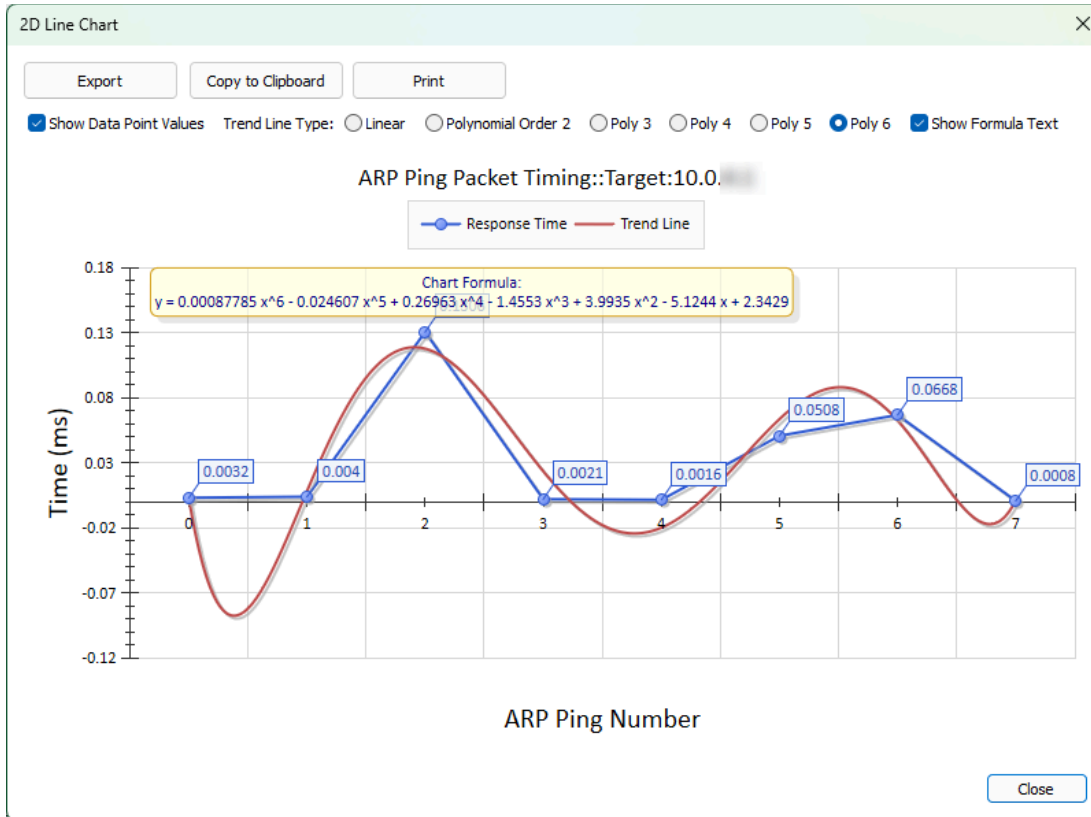

V12 ARP Cache Tool

- Now with more items populating to the Cache (invalidated items)

ARP Ping/Timing Chart

Request for Website Testimonials

We are looking for testimonials to feature on our new website. If you and your organization are willing to participate, please email us at robby@meetnetscantools.com
