NetScanTools®

Newsletter - October 2025

In This Issue

- **Switch Port Mapper update (v2.88)**
- **Call for customer testimonials**
- **New SSL Certificate Scanner release.**
- **Updates to how downloads are distributed and signed.**

Switch Port Mapper Update Version 2.88

Highlights:

- Fixed database export issue where SQL reserved characters could trigger an exception during export.

- Removed the toolbar that appeared below the menus.

- SNMP Walk Tool now correctly identifies and shows the source of errors — making troubleshooting faster and clearer.

- Manual "Check for Update" now offers a direct link to the download page when an update is available.

- PDF manual now included for easy offline access.

- Updated SQLite to version 3.50.4.

- Updated MAC address/Manufacturer database.

- Added Extended Validation (EV) certificate to reduce Windows SmartScreen warnings and improve installer trust.

Website & Testimonials We'd Love to Feature You!

As part of our ongoing website rebuild, we're highlighting the people and organizations who use NetScanTools every day.

If you're a happy customer, we'd be grateful for a short statement about what you like most or how you use our tools. It doesn't need to be long — even a sentence or two helps us show the real-world value our software provides.

Here are a few ways you can help:

- **Write a brief quot**e (for example: "NetScanTools Pro is my reliable go-to for fast, versatile network analysis")
- **Include what you're comfortable sharing** — whether that's your name and title, your organization, or just your company logo.
- **Mix and match** — we're happy to work with whatever level of visibility you prefer. Some customers share only a logo, others just their name and title, and many include all three. Any participation is appreciated!

How to Contribute

Simply reply to this newsletter or email support@netscantools.com with your short statement and the details (name, title, company, logo, etc.) you're comfortable sharing.

Other New Updates

- Downloads on FastSpring are now EV code-signed executables (.exe) instead of compressed ZIP files — simpler installs and fewer security prompts.

- Public downloads are also now EV-signed executables.

- SSL Certificate Scanner 2.82 (Released October 13, 2025): Added visibility to export options via right-click.

Thank you all for reading and for your loyal support, it's our pleasure to serve you!
